Summary: I am an environmental scientist with two master's degrees—one in Water Governance from IHE Delft Institute for Water Education and another in Forest Governance from Njala University. I have contributed to the WWF Flood Green Guide project and the Earth Charter International Young Leaders initiative. My research has been published in the Young African Leaders Journal, World Environmental Education Book, and Academia.com. I am also a co-author of We Have a Dream and have contributed to papers under review for PLOS Water and other publications. My expertise includes climate change, community engagement, gender equity, biodiversity conservation, and disaster risk management, with strong skills in collaboration and coordination.

Relevant Education:

- October 2023-October 2024; M.Sc. Water and Sustainable Development with a Water Ecosystems Governance; Alumna, IHE Delft Institute for Water Education, Netherlands
- November 2019- February 2021; M.Sc. Forestry focusing on statistics and field research analysis; Alumna Njala University, Sierra Leone
- September 2015- August 2019; B.Sc. Environmental Science with a focus in Occupational Health and Safety; Alumna Stella Maris Polytechnic University, Liberia
- September 1999-2014; High School Diploma; Alumna St. Teresa Convent High School, Liberia

Relevant Work Experience:

September 2024-present; Pulaquqa, The Netherlands (Milieu Defensie FFG):
I support Pulaquqa's citizen science project, helping local communities participate in water quality monitoring. I work to ensure diverse groups are included in water management decisions and contribute to sustainable solutions.

January-July 2023; West African Civil Society Institute, Ghana (Knowledge Management Assistant):
I supported the West Africa Civil Society Institute's Knowledge Management Unit in the collection and organization of knowledge to improve West African Civil Society Organisations' policy strategies. I edited issue papers themed on West African Civil Society Organisations' role in conservation and climate change adaptation.

May 2021-January 2023; Fauna & Flora, Liberia (Biodiversity and Behaviour Change Communication Project Assistant):
I spearheaded community engagement projects across at least five counties, empowering women as change-makers for wildlife preservation. In this position, I worked with several partner organizations.

April-June 2019; MNG Gold Liberia (Intern Environmentalist):
I served as an environmental intern with MNG Gold and Avesoro Holdings, working to minimize the risk of environmental hazards and water pollution in and around the company.

April 2017-January 2019; Montserrado County Health Team, Ministry of Health, Liberia (Environmental Health and Safety Technician):
I worked with field staff to conduct food safety inspections at restaurants, supermarkets, and local marketplaces in line with Title Thirty-three (33) under the National Public Health Law of Liberia. I also coordinated the World Handwashing Day programme, raising funds through JICA and other partners.

Volunteerism

23 June 2024; The Climate Chain, Urgenda Foundation, Netherlands

31 May 2024; Milieudefensie Klimaatmars op de Zuidas, Netherlands

01 September 2023-June 2024; Flood Green Guide Youth Mentor, USAID-World Wildlife Fund

10 and 17 December 2022: Community Service, Young African Leadership Initiative

26 June 2022: Community Service, Youth United for Sustainable Development

July 2018: Teaching and Counselling, Hope At Dawn Foundation

September 2017: Teaching and Counselling, Let's Give Foundation

Additional Training:
